

Peace of mind for pennies a day.

KCP&L's Meter-based Surge Protection device provides peace of mind for pennies a day.

- The monthly service fee is only \$5.95 plus tax, which we'll conveniently add to your KCP&L bill.
- Installation and maintenance of the Meter-based Surge Protection device is **free** for life.
- The service is automatically renewed annually or you can discontinue the service after a year at no charge.

How do I sign up?

Join thousands of homes already safeguarded by Meter-based Surge Protection by placing your surge protection order online at www.kcpl.com/surge or by requesting a copy of the Terms and Conditions be mailed to you. If you have additional questions, please contact us at **(816) 472-0432**. Please allow four to six weeks for installation.

Tell a friend and save!

If you have a friend or relative who would appreciate the protection and peace of mind that KCP&L's Meter-based Surge Protection provides, have them call **(816) 472-0432**. If they include your name in the "referred by" section of their Terms and Conditions, we'll give you a \$10 credit on your next electric bill. Referrals must be KCP&L customers. There's no limit to the credits you can earn.

The Missouri Public Service Commission or the Kansas Corporation Commission does not regulate Meter-based Surge Protection.

Meter-based Surge Protection

Meter-based Surge Protection: *your "first line of defense" against damaging electrical spikes and surges*

\$5.95 per month

Utility-Grade Protection

Free Installation

Free Lifetime Maintenance

Peace of Mind

\$10,000 Warranty

What causes a power surge?

Power surges occur when something boosts the electrical charge at some point in the power lines. This causes a disruption in the electrical potential energy, which can increase the current flowing to your wall outlet. If the surge or spike is high enough, it can cause some heavy damage on a machine. There are several causes to electrical disturbances that can result in a surge, including:

- Microwaves
- Washer/Dryers
- Lightning
- Equipment Failure
- Air Conditioners
- DVD Players
- Auto Accidents
- Refrigerators
- Computers
- Tree Limbs
- Birds
- Televisions
- Severe Weather
- Hair Dryers
- Vandalism

There are more electronics and high-tech appliances in homes today than ever before. These devices are highly vulnerable to voltage spikes and electrical surges that often enter homes and silently damage or destroy valuable computers, TVs, DVD players, microwaves and other valuable appliances. The cost to repair or replace these items can be a huge investment. Fortunately, there's a simple and inexpensive solution to this potential problem.

KCP&L's Meter-based Surge Protection.

Meter-based Surge Protection provides utility grade protection to **stop** electrical surges at their source. With Meter-based Surge Protection, you can safeguard your appliances and electronic equipment.

The best protection begins at your electric service meter.

Mounted to your electric meter, KCP&L's Meter-based Surge Protection filters surges before they enter your home's electrical system, guarding your equipment and protecting your investments. It's your "first line of defense" against potentially damaging electrical spikes and surges.

Why do you need this type of protection?

Appliances and electronics are high-speed, high definition and high performance. Engineered with complex circuitry, newer home appliances have an enhanced sensitivity to even the slightest variation in power.

Though surges may last for only an instant, these power irregularities can damage or even destroy sensitive electronic circuitries built into most modern appliances or electronics. The damage can be permanent and costly, resulting in data loss, equipment repair or replacement and downtime.

How surges can shorten your product's life span.

Power surges that don't melt parts or blow fuses can damage equipment over time. They cause electronic rust that gradually degrades equipment circuitry and reduces operating efficiency. You probably won't realize this is happening until a device begins performing poorly or fails prematurely.

It's like having an insurance policy for your electronics.

KCP&L is so confident of the Meter-based Surge Protection device's ability to protect your electronics that we'll reimburse you **up to \$750 per appliance, \$10,000 annually**, in the unlikely event that an external power surge causes damage. **Your electric and surge accounts must be kept current to receive warranty coverage.**
